Attached is the QAPP that includes the pore water data collection i.e. summarizing how the samples were collected, how the composites were made, the analytical techniques used, and a figure. Also attached is the CapSim Model tech memo which summarizes the pore water data.

Hi Rob,

I have the pore water data, but can't seem to find a report summarizing how the samples were collected, how the composites were made, the analytical techniques used, a figure, etc.

I assume some such report/summary was prepared -- could you please forward it?

Thanks,
Stephanie
